## DANIELS SHARPSMART RANGE

The Daniels Sharpsmart system is the world's safest and most environmentally responsible sharps management system. Nitrogenx offers you a complete door-to-door sharps service that; removes the risk of injury from your sharps containers and protects the environment by reducing plastic waste. Sharpsmart containers have a leak-proof seal that eliminates leakage and a swing action safety tray providing a large opening while restricting hand access. A clear content level makes visibility easy with a safety tray which automatically stays upright when the collector is full. Lockable wall brackets, trolley brackets and stands are available.

### S32 DANIELS SHARPSMART
