Level 1 Alert Under Covid-19 New Zealand

As we all breathed a sigh of relief that we had moved into level 1 and could hug our nearest and dearest we celebrated.

What we have been reminded of is that we were still on our trainer wheels and the past few weeks has highlighted the importance of doing the right thing every day, all day. From washing hands regularly, keeping note of where you have been etc and checking if clients, patients etc have travelled or have flu like symptoms the way is not yet clear sailing. As the PM has advised us all "Elimination is not a point of time. It is a sustained effort"

To help our customers we wanted to remind everyone that we can support you by way of additional short term rentals on pedal bins for medical waste, bags to place PPE gear into prior to going into the main disposal bin.

We can provide you with sanitiser, disposable gloves and masks so please let us know if you would like a standard monthly order. This always ensures that there is enough for everyone and consistent supply so please ask.

If you do not have a copy you can download the medical waste segregation poster and provide to staff to ensure everyone is consistent about what to do with any potential infectious waste. [DOWNLOAD HERE](#)
